

CT - M 100 N

Engine data version 03.2011

Basic Data		
Fuel		natural gas
Minimum heating value Hu	kWh/m ³	10
Methane number	Mz	≥ 80
Heating water system temperature	°C	70 / 90
CHP coefficient		0,61
Frequency	Hz	50
Nominal voltage Un	V	400
Speed	min ⁻¹	1.500
Intercooler version	°C	-
Electrical nominal power at cosφ=1	kW	100
Thermal power utile *	kW	163
Fuel power input	kW	294
Efficiency electrical	%	34,0
Efficiency thermal	%	55,6
Efficiency total	%	89,6
After-treatment of exhaust gases		lambda=1 and
Pollutant emissions		
(dry exhaust gas with 5% O ₂)		
Formaldehyde (CH ₂ O)	mg/Nm ³	< 20
NO _x measured as NO ₂	mg/Nm ³	< 125
CO	mg/Nm ³	< 150

Engine		
Engine Type		MAN E 2876 E 312
Combustion type		gas engine
Operating principle		4-stroke
Cylinder No./ configuration		6 in line
Displacement	l	12,8
Engine power according ISO 3046/1	kW_mech	105
Specific fuel consumption	MJ/kWh	10,08

Generator		
Type of Generator		Leroy Somer 44.3 L10
Apparent power	kVA	150
Voltage	V	400
Stator connection		Y
Ambient temperature max.	°C	40
Protection class		IP23
Radio interference class acc. VDE 0875		N
Heating class		

Heat exchanger unit		
Engine cooling water heat output	kW	104
Intercooler HT heat output	kW	-
Intercooler LT heat output	kW	-
Exhaust heat (cooling up to 120°C)	kW	59
Total thermal power output via plate heat exchanger	kW	163
Heating water temp. inlet max.	°C	70
Heating water temp. outlet max.	°C	90

Design and operation		
Lubricant oil content engine min./max.	l	19/28
Lubricant oil storage tank	l	85
Generator efficiency cosφ=1, 400V	%	95,4
COGEN current rated	A	179
Radiation heat module	kW	24
Intake air mass flow	kg/h	4.606
Outlet air mass flow	kg/h	4.242
Combustion air mass flow at 25°C and 1013 mbar	kg/h	364
Intake air temp. ISO 3046 dimensioning	°C	25
Exhaust mass flow wet	kg/h	386
Exhaust volume flow, dry 0% O ₂ (0°C, 1013 mbar)	Nm ³ /h	355
Permissible exhaust gas back pressure downstream of module for piping	mBar	5
Externe Pressung des Lüfters	Pa	100
Airborne noise (sound pressure level) encaapsulated modul at 1 m distance **	dB(A)	75
Exhaust noise (sound pressure level) with primary exhaust silencer at 1 m distance ***	dB(A)	75

Connections and interfaces		
Gas inlet		Rp 1 1/2"
Exhaust gas outlet (flange)		DN100 / PN10
Condensate drain		R 1/2"
Heating water inlet/outlet (flange)		DN50 / PN10
Intercooling system LT inlet/outlet (flange)		-
Flanges conform to DIN EN 1092-1		

Module dimensions and weigh *		
Length	mm	4.112
Width	mm	1.000
Height	mm	2.384
Operating weight approx.	kg	3.440

* Possibility of increasing thermal power by using a calorific value waste-gas heat exchanger.

** Measurement of noise in free field, tolerance ± 1.0 dB(A)

*** Measurement of noise in free field, tolerance ± 2.5 dB(A)

* Dimensions with ventilator and feet. Lenght whitout stillage for return riser.

Tolerance for preceding heat output ±7% and energy input +5% according full duty.

All further data are valid for grid parallel operation. Derating through adjustment of reactive power factor cosφ by energy supplier possible.

Features of our scope of supply are only warranted, when SES expressly stated the warranty. Power and efficiencies according ISO 3046/1 and DIN 6271, at 25°C air temperature, 100 kPa air pressure (at 100 m above sea level), 30% rel. humidity, methane number see basic data, as well as cosφ= 1. As fuel natural gas according German DVGW Worksheet G260, category 2, group L/H is valid. Furthermore following documents are valid: MAN Operating Materials and Operating Instructions for MAN Industrial Gas Engines in latest edition. These documents are available on request. A gas flow pressure before module of 20 - 50 mbar is necessary (other gas flow pressures are available on request). A temperature of intake air of 10 °C to 25 °C has to be ensured. Data for other operating conditions or gas qualities are available on request.
